The Manufacturer hereby certifies that:
- supplied equipment are manufactured, inspected and approved in accordance with specified methods, requirements and routines
- the performance characteristics of the equipment are verified by means of type inspection
- identity exists between the supplied equipment and the corresponding type tested equipment

Identity in this context means that all data and performance properties required for the equipment to pass the type tests specified shall apply to this delivery as well (i.e. the qualified status of the supplied equipment is maintained).

*This statement is checked and approved by the undersigned, being an authorized representative of the Manufacturer's technical and quality departments.*
